EDUCATION

Punjab University College of Information Technology (PUCIT)

Lahore, Pakistan

Bachelor of Science in Software Engineering

Expected 2028

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Systems, Computer Networks, Operating Systems, Software Design & Architecture.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++, C

Frontend Development: React 19, Vite, Tailwind CSS, HTML5, CSS3, Responsive UI, Axios, Recharts

Backend & Databases: Node.js, Express.js, MongoDB Atlas, Mongoose ODM, RESTful APIs, JWT Authentication

Tools & DevOps: Docker, Git, GitHub, Linux/Bash, Postman, Vercel, Render, OpenRouter AI APIs

PROJECTS

CampusHub AI — Smart University ERP & Academic Copilot | [Live Demo](#) | [GitHub](#)

Aug 2026

- Architected a full-stack university ERP with Role-Based Access Control (**RBAC**) for Admins, Faculty, and Students.
- Engineered an AI study assistant utilizing **OpenRouter API** with automated retry fallbacks and formatted Markdown outputs.
- Implemented stateless JWT authentication, protected routes, and managed live cloud deployments on **Vercel** and **Render**.

PayPulse — Full-Stack Digital Banking Platform | [Live Demo](#) | [GitHub](#)

Jul 2026

- Engineered a digital banking web portal with peer-to-peer money transfers, balance validation, and searchable transaction history.
- Implemented goal-oriented locked savings vaults and dynamic personal QR code generation for camera-based transfers.
- Automated client-side PDF document compilation for monthly statements and transaction receipts using **jsPDF**.

BugTracker — Collaborative Defect Management System | [Live Demo](#) | [GitHub](#)

Jun 2026

- Designed an end-to-end defect tracking system enabling engineering teams to log, prioritize, assign, and resolve project bugs.
- Constructed dynamic sprint lifecycles, multi-parameter ticket filtering, and real-time status dashboards for sprint metrics.
- Secured API endpoints with custom Express middleware, CORS restrictions, and robust schema validations via Mongoose.

WeatherTrack — Real-Time Meteorological Dashboard | [Live Demo](#) | [GitHub](#)

May 2026

- Developed a weather analytics app utilizing browser Geolocation APIs for current, hourly, and 7-day extended forecasts.
- Engineered persistent client state for recent searches and favorite locations using browser **LocalStorage**.
- Implemented dynamic temperature metric conversion ($^{\circ}C \leftrightarrow ^{\circ}F$) with asynchronous REST API integrations.
